

HEMANTH YASASWI MUDIVARTI

✉ hemanthmudivarti@gmail.com | ☎ +91 7660827652

CAREER OBJECTIVE

Computer Science undergraduate (AI & ML, 2027) proficient in **Java, Python, C**, and **full-stack web development**. Experienced in building and deploying applications using **React, Node.js**, and **REST APIs**, with real-world exposure through a **software development internship**. Demonstrates strong **problem-solving**, clean code practices, and collaborative skills. Seeking a challenging **software engineering role** to grow within a high-performance team.

LinkTree: hemanth-yasaswi.github.io

EDUCATION

Vidya Jyothi Institute of Technology (VJIT) Jul 2023 – Jun 2027
B.Tech — Computer Science & Engineering (AI & ML), CGPA: **9.05** *Hyderabad*
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Tapasya Junior College Jun 2021 – May 2023
Intermediate Education — **90.8%**

TECHNICAL SKILLS

Programming Languages	Java, Python, C, JavaScript, SQL
Web Technologies	React.js, Node.js, Express.js, Flask, REST APIs
Databases	PostgreSQL, MySQL, SQLite
Developer Tools	Git, GitHub
Concepts	OOPs, DSA (Java), DBMS, Operating Systems, Computer Networks
Additional Exposure	OpenCV, Python ML Libraries

TECHNICAL SUMMARY

Programming Languages
Solid foundation in **Core Java** with practical understanding of **Object-Oriented Programming, Exception Handling, Collections**, and **Multithreading**. Actively practises **Data Structures & Algorithms in Java** across competitive programming platforms, building strong logical reasoning and problem-solving skills.

Technologies Known
Experienced in developing **full-stack web applications** with **React.js** on the frontend and **Node.js, Express.js, and Flask** on the backend, backed by relational databases including **PostgreSQL, MySQL, and SQLite**. Skilled in **REST API design and integration**, version control with **Git and GitHub**, and **Agile development workflows**. Carries additional exposure to **OpenCV-based computer vision** and **AI/ML fundamentals** through academic and project work.

PROJECTS

Dup Detector — Real-Time Duplicate File Detection System github.com/hemanth-yasaswi/DDAS
Primary Project | v2 actively in development

- Engineered a real-time duplicate file detection desktop application using **event-driven folder monitoring with Watchdog**, automatically triggering scans on file creation and modification events without resource-intensive polling.
- Implemented **SHA-256 content hashing** for accurate content-based duplicate identification, enabling reliable detection of identical files irrespective of filename, format, or storage location.

- Architected **DDAS v2** with advanced duplicate analysis capabilities including BLAKE3 hashing, perceptual image similarity detection, NLP-based text comparison, SQLite metadata indexing, adaptive resource optimization, and a PyQt6-powered analytics dashboard.

Tech Stack: Python, Watchdog, hashlib (SHA-256), Tkinter, SQLite (v2), PyQt6 (v2), BLAKE3 (v2)

Firearm Detection — Security Tool

github.com/hemanth-yasaswi/Weapon-Detection

- Built a Python-based firearm detection system using **OpenCV and Haar Cascade Classification**, supporting **3 input modes** — static images, pre-recorded video, and live camera feed — with real-time bounding box visualization and on-screen alert overlays.
- Integrated **Twilio API** to trigger automated SMS and email alerts to emergency contacts upon detection, extending the system into a functional security notification pipeline.
- Implemented **timestamp annotation** on live video feeds and multi-instance bounding box rendering, enabling simultaneous detection of multiple firearms within a single frame.

Tech Stack: Python, OpenCV, Haar Cascade Classifier, Twilio API, NumPy, imutils

INTERNSHIP

MicroSysLogic Technologies

September 2025 – Present

Web Developer Intern

On-site, Hyderabad

- Designed and developed **REST API endpoints and PostgreSQL database schemas** for two production-grade enterprise systems — an IoT telemetry backend and an access management platform — using **Node.js, Express.js, and Flask**, supporting active device connections and role-based access workflows.
- Architected **RBAC-driven backend logic** for an enterprise locker management system with a three-tier access hierarchy, integrating a **facial recognition module** for contactless authentication and implementing secure session management.
- Collaborated within a **cross-functional Agile team**, contributing to sprint planning, peer code reviews, and frontend development with **10+ React.js components**, and integrating **ThingsBoard IoT platform** for real-time telemetry storage.

Technologies: Node.js, Express.js, Flask, PostgreSQL, React.js, ThingsBoard, REST APIs, Git

Full internship details: [View Detailed Experience Document](#)

ACHIEVEMENTS, HACKATHONS & TRAININGS

- **Smart India Hackathon 2024 — College Finalist:** Advanced to the college-level finalist round; served as the **sole developer** and architected the foundational prototype of what later became the **Dup Detector (DDAS)** project, demonstrating independent full-cycle development under competitive constraints.
- **HackPrix 2024 — Participant:** Engineered a functional working prototype within a **24-hour sprint** at a hackathon conducted by Lords Institute of Engineering & Technology in collaboration with GIT.
- **Ideathon 2025 — Participant:** Proposed a scalable technical solution addressing a real-world challenge aligned with the **United Nations Sustainable Development Goals (UN SDGs)**.
- **SmartInterviews — DSA Training:** Completed intensive **Data Structures & Algorithms training in Java** covering arrays, linked lists, trees, graphs, and dynamic programming, strengthening problem-solving and logical reasoning skills.

CERTIFICATIONS

- **Explore Machine Learning with Python** — Infosys Springboard, 2025 [\[View Certificate\]](#)
- **Google AI Essentials** — Coursera (Google), 2025 [\[View Certificate\]](#)
- **Foundations of Cybersecurity** — Coursera (Google), 2024 [\[View Certificate\]](#)
